DETAILED ACTION

1. Applicant's amendments, filed 7/16/01, 8/17/01, 12/4/02 and 3/3/03 are acknowledged. Claims 1-66 have been cancelled. Claims 67-96 have been added and are pending.

Sequence Compliance

2. The instant application appears to be in sequence compliance for patent applications containing nucleotide sequence and/or amino acid sequence disclosures.

Restriction Requirement

3. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 67-80 and 94-96, drawn to a soluble CTLA4 mutant molecule and pharmaceutical compositions comprising; classified in Class 530, subclass 350.
- II. Claims 81-93, drawn to an isolated nucleic acid encoding a soluble CTLA4 mutant molecule; vectors, host cells, and methods of producing the polypeptide, classified in Class 536, subclass 23.5; Class 435, subclasses 69.1, 455, 252.3, and 320.1.

The Inventions are distinct, each from the other because:

4. Groups I and II are different products. Nucleic acids and polypeptides differ with respect to their structures and physicochemical properties; therefore each product is patentably distinct.
5. Groups II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product, the protein can be made using an amino acid synthesizer.
6. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, a prior art search also requires a literature search, which would not be completely co-extensive. It is an undue burden for the examiner to search more than one invention. Therefore restriction for examination purposes as indicated is proper.

Art Unit: 1644

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
